+91-900-037-6416

As a techno-functional professional with 12 years of experience, I began my career at Deloitte, building expertise in Java and Oracle Intelligent Advisor (OIA), a robust rules engine. I specialize in architecting scalable solutions, leading complex integrations, and bridging functional requirements with technical solutions. As a Senior Principal Consultant at Oracle, I lead end-to-end projects across Public Sector, Higher Education, and BFSI industries. TOGAF certified, with advanced knowledge and certifications in Oracle technologies such as OIA, Oracle Integration Cloud (OIC), and microservices, I consistently deliver impactful results. I have earned multiple out-of-turn promotions and consistently high-performance ratings throughout my career. Recently ranked in the top 0.04% at CodeGladiators 2023, I am passionate about solving complex challenges with precision and innovation.

## PROFESSIONAL EXPERIENCE

### Senior Principal Consultant, Oracle

Delhi, India

*Jun. 2016 – Present*

#### Responsibilities:

- Drive strategic requirement analysis, scoping, and resource planning for high-impact projects spanning the entire customer lifecycle, including pre-sales demonstrations, solution design, and post-production support, across a global portfolio.
- Lead enterprise-level architectural processes, crafting robust, scalable, and technically sound roadmaps that align business needs with cutting-edge solutions.
- Champion innovation by identifying and implementing transformative approaches to enhance product functionality, ensuring measurable client value.
- Serve as the go-to authority for Oracle Intelligent Advisor (OIA) and its integrations, leveraging deep expertise in Oracle Integration Cloud (OIC) and microservice architecture to deliver solutions that exceed expectations.

#### Key Initiatives/Projects:

- Designed and implemented a Java-based connector for OIA, now a **reference implementation** and a cornerstone for multiple high-value projects worldwide.
- Delivered transformative solutions for three large-scale **public sector projects**, each exceeding \$100M, driving significant operational efficiencies across continents.
- Played a pivotal role in numerous **BFSI projects** across Europe, Asia, and Australia, including two flagship engagements valued at over \$20M each, delivering unparalleled value to stakeholders.
- Engineered multiple connectors for integrating OIA with Oracle and third-party SaaS applications (HCM, B2B, B2C), leveraging Java, OIC, and SOA to ensure flawless interoperability.
- Pioneered a multi-application **Sustainable Waste Management** system leveraging **IoT and Blockchain**, propelling it to the **final stage of the Madhack competition** and securing submission to Accenture's Mastermind.

#### Rewards and Recognition

- Consistently ranked in the **top 2%** of employees, earning the highest performance ratings for driving impactful outcomes and demonstrating sustained excellence.
- Repeatedly acknowledged for outstanding performance, showcasing a **blend of technical expertise, strategic vision, and dedication**.
- Secured **four promotions in eight years**, including multiple out-of-turn advancements, reflecting exceptional contributions and leadership potential.

### Consultant, Deloitte Consulting

Hyderabad, India

*Jan. 2013 – Jun. 2016*

- Implemented the Eligibility Module of **Integrated Eligibility Solution (IES)** using Java and OIA for a prestigious State Government project, exceeding \$300M.
- Acted as the **Point of Contact for the Eligibility Module**, responsible for all aspects of design, development, testing, and deployment.
- Successfully implemented policy rules within the module, ensuring accurate and efficient eligibility determination.
- Expertly integrated OIA (Oracle Intelligent Advisor) with the Java-based driver through **robust web services**, enabling seamless data exchange and **real-time processing**
